

ABSTRACT OF THE DISCLOSURE

A gaming device, which awards an initial award to a player, discloses to a player that a higher valued enticement award is available and selectable, and enables the player to selectively swap the initial
5 award for an opportunity to select the enticement award. The game preferably discloses the value of the initial award and the enticement award. The game masks the enticement award in a pattern along with one or more masked consolation awards, the consolation awards having values less than the value of the initial award. The game
10 reveals the awards using a secondary display having mechanical doors that open and close.
